New and improved design, the Viagrow™ Grow Room Tents are top of the line. Enclose your space inexpensively and effectively with a grow room tent. This light blocking, waterproof and reflective tent is perfect for your indoor garden. The outside of the tent is a thick black woven fabric, while the inside is lined with a thermally adhered layer of tough, washable, textured reflective mylar surface. Each grow room features heavy duty light tight zippers, Velcro closures, overlapping woven fabric.

Please click on the MANUALS tab for grow room tent setup instructions and parts list.

- Increased weight capacity - roof cross-members can support up to 100 pounds (note: large reflectors, fans and filters rarely weigh over 50 lbs total)
- Sturdy powder coated 16mm steel tent frame and cross members - protects against rust and gives a clean reflective look
- Welded powder coated steel corners with easy push button metal tube frame connects. No plastic corners to break or lose
- Highly 95% reflective interior - significant increase in reflectivity for improved lighting performance
- Thermally protected - tent material reflects 97% of all radiant heat for superior insulation
- Completely non-toxic material - material does not react with light and heat with no off-gassing to harm sensitive plants
- Improved fabric & zippers - thicker fabric than previous models, with easy to use heavy duty zippers
- Moveable roof cross-members - easily adjust lighting and accessories; pieces slide across framework for better placement and functionality
- Multiple intake/exhaust ports/cord holes - including two ports opposite each other at reflector level for air-cooling of lighting system on most models (see manual for specific port sizes and placement)
- Large screen style vents, opened or closed positions with built-in Velcro flaps
- Adjustable fan, ducting or filter attachments constructed of nylon Velcro straps - no clamps or reducers needed
- Waterproof floor - a second liner that is removable for easy cleaning between crops or in the case of a water leak, spill or overflow

Hydro Grow Room Deluxe Complete, 4' X 8' X 7' Tall

By: Viagrow
SKU# VHH4X8

Our Price: \$1,849.99

6 341

[Features](#)

[Dimensions](#)

[Manuals](#)

[Related Items](#)

The Hydro Grow Room Deluxe Complete System is top of the line! We have filled the light blocking and reflective grow tent and customized it for the best in indoor gardening! Comes ready to grow with stands, 50 1 gallon pots, 2 3' x 3' Botanicare flood tables, 2 40 gallon reservoirs & lids, 2 submersible pumps, tubing & fittings, 2 400 watt switchable light systems with HPS bulbs, ratchet hook light hanger movers, 4" carbon air filter, 4" inline fan, ducting, thermometer/hygrometer, mini clip fan, and 2 timers. Choose your nutrients and media based on preference, they are not included.

Note: Picture is shown with the White Botanicare Grow Trays, but system will come with the Black Botanicare Grow Trays.

When adding an HID light system to the inside of a grow tent, it is often hard to keep the temperature down. This can be easily achieved by cooling your light - simply add an air-cooled reflector and attach it to an inline fan and ducting. When you pull cool air from outside of the room, through the bulb, and out the other side, the heat from the bulb never enters the grow room, making it the perfect environment for your plants.

NOTE: This Product can NOT be shipped via UPS; a special freight carrier is required. Average shipping cost varies, and you will be notified if additional shipping charges apply before processing. Please feel free to call us at 866-803-2100 should you have any questions regarding your order.

The Organic Grow Room is top of the line! We have filled the light blocking and reflective grow tent and customized it for the best in indoor gardening! Comes ready to grow with Urbin Grower kit, 150 watt HPS light system, ratchet hook light hanger movers, 4" carbon air filter, a 4" inline fan, ducting, thermometer/hygrometer, mini clip fan, and light timer.

The UrBin Grower provides endless organic vegetables by facilitating growth through a mixture of the Square Foot Gardening method, all natural soil amendments, and a self-watering reservoir. Simply mix in the amendments with your soil, plant your vegetables, and wait until the roots are long enough to dip into the reservoir. You'll never have to worry about over or under watering again!

- Perfect for Urban Families - Efficient in small spaces or backyards
- Multipurpose Containers - Portable, adaptable, manageable
- Watering Plants the Way Nature Intended - Conserves water
- Trace Minerals - From Volcanic Rock and Glacial Sand

Both plants and animals, including humans, benefit from a regular supply of trace minerals, which are best transferred to the human body through vegetables grown in soil rich in trace minerals.

Today nearly all agriculture land is depleted of trace minerals, due in part to the exclusive use of chemical fertilizers and ground water pollution.

For trace minerals to be quickly absorbed by plants they must be finely ground into rock dust. In technical terms - 75 microns. Because these trace minerals are so finely ground, they react like clay clumping together when any amount of moisture is added.

Grow Tents

To all intents and purposes a grow tent is the same as a grow box in that it is a self-contained indoor growing space that allows you to create the perfect environment for your strong and healthy marijuana plants.

Grow Tent Features

From fabric and zipper quality to light resistance and convenient ports, learn what to look for in a good grow tent.

How Many Plants Fit in My Grow Tent

Consider not only the size of your grow tent, but the strain of cannabis you wish to grow. As a rough guide, a small 2' x 2' tent supports 16
