The Coalinga Active Transportation Plan provides a strategy for the development of a comprehensive bicycling and walking network throughout Coalinga, as well as strategy for support facilities and education, encouragement, enforcement, and evaluation programs. It includes a Trails Master Plan that provides a strategy for the development of Class I shared-use paths or trails in and surrounding Coalinga. The Safe Routes to School Plan provides a strategy for the City and Coalinga-Huron School District to partner and provide safer and accessible routes to and from school for all travel modes, focusing on walking and bicycling, through a series of project and programmatic recommendations.

The City completed its 5-Year regional active transportation plan update on in ATP and expected to present to the City Council in 2025.

The City applied and was awarded funds for segments 1, 2, 13 and 14 and a portion of segments 3, 3N 4 and 9 of the multi-use trails master plan for walking and biking to provide alternative forms of transportation and recreation for the community. These projects have funding authorization and environmental has been certified for both and are now entering the right-of-way and design phase of the project funding. These projects are funded through the State of CA Active Transportation Program and CMAQ program funds.

All of the proposed street improvements projected in the upcoming year will help meet the goal of providing a balanced, safe and efficient circulation system that includes cars, public transportation, bicycles and pedestrians with the mind set of anticipated growth (*Goal C1*).

These transportation projects also help in maintaining and improving the City's existing circulation and transportation facilities. Through the budget process and street maintenance planning, the City has been able to identify the necessary improvements within the planning area that will have the highest level of impact.

The City currently uses Street saver to monitor and select appropriate treatments for the City streets in an effort to maximize funding sources available for street maintenance projects. In addition to the use of Street saver, the City entered into a contract with Good Roads to use new technologies such as artificial intelligence to determine pavement conditions and recommended treatments.

A comprehensive list of projects that the City has in various stages of design and construction can be found here:

 2. Individual appendices, which contained details for each jurisdiction (i.e., sites inventory, governmental constraints, evaluation of existing Housing Element) and individual implementation programs for Coalinga.
